OUR LAST SPRING, 1937, NEW YORK SHOW GARDEN

LANDSCAPE SERVICE

THERE is nothing that so improves the looks of a home or grows into money so fast as well-landscaped and carefully planted grounds. In order to assure you best results, your landscape man must not only be thoroughly trained in his art, but he must know plants, and not only know plants but he must know what they will do in your particular soil and climate. Our landscape people are thoroughly trained in their profession and know just what plants will thrive in this section.

People are taking more and more to the outdoors, so why not fix up that outdoor living-room where the family can enjoy the beauty of the scene from the shade of your own trees?

We grow practically all the planting material used in our work, and would be pleased to have you call at the nursery and examine our stock.

Whether you want a ready-made home with large trees and shrubs, or grounds with small plants that you can watch grow, we are prepared to serve you.

If you wish us to look over your property, we shall be glad to do so, and will furnish plans for improvements without charge, unless elaborate plans are necessary. Appointments can be made on short notice.

TIME TO PLANT

Plant Perennials from April 1 to June 1 and September 1 to November 15.

Plant Roses from March 15 to May 15 and October 15 to December 1.

Plant Peonies and Irises from September 1 to frost.

For late planting in the spring, we carry field-grown perennials and plants in pots.

DELIVERY. Unless otherwise instructed, we will ship all orders to arrive at proper planting-time. Postage prepaid when cash accompanies order.

TERMS. If you desire to open a charge account, please send bank or trade references with order.

VISITORS WELCOME. We shall be very glad to see you if you are in the vicinity of our Nursery and will be glad to show you over the grounds and point out the quality of our stock.

HARDY PERENNIALS and ROCK-PLANTS

These old-fashioned, hardy flowers have won an important place in the gardens of most flower-lovers because of their varied formation and gorgeous range of color. Year after year they are among the first flowers to greet us in the spring, with renewed vigor after the winter rest, and the last flowers to leave us in the fall.

Considering the countrywide trend toward economy, the perennial garden, in the long run, is the most economical garden to plant because

once planted it eliminates the expense of replanting every year. Many varieties are useful as cut-flowers. They need very little care outside of weeding and cultivation. After the first hard frost, cut the tops down and cover with a good coat of well-rotted manure.

Plants of the following varieties are fine, strong, nursery-grown stock, with the exception of a few that are best transplanted from pots, and will bloom abundantly this year.

DEEP LAVENDER and BLUE
PURPLE**

Each one of these plants has been carefully chosen when in flower because of its unusual merit. Your choice of the above colors,

\$1 each, \$10 per doz., \$75 per 100

Assorted Plants. This grade includes the regular run of the field, covering the entire color-range but not marked for color or type.

50 cts. each, \$5 per doz., \$35 per 100

Potted Plants. We also have young plants in 3-inch pots for very late spring sales after field-grown plants are too far advanced to be transplanted. Although they will not produce as many flower-spikes as the field-grown plants the first year, they will flower the latter part of the summer.

35 cts. each, \$3.50 per doz., \$25 per 100

WE HAVE developed these beautiful perennial flowers into one of our most important specialties. Neither time, patience, nor expense has been spared to bring them to their present state of perfection. These greatly improved hybrids produce numerous massive and stately spikes 5 to 6 feet high, bearing large, double and semi-double flowers of perfect form throughout one-half to two-thirds their entire length. The colors range from palest blue to deepest indigo and from most delicate mauve to glowing royal purple, passing through innumerable intermediary pastel shades of bewildering richness and variety.

Our keenest desire is to have you grow these lovely things in your garden. They will stand comparison with any Delphiniums in the country.

Prize-Winners

OUR Delphinium Hybrids have been consistent winners of prizes at all the shows where they have been exhibited. They have become so well known because of their outstanding size and

formation that we often hear people remark at the shows, when we are arranging our exhibit, "Those must be Turner Bros.," even before name-cards are placed.

It is very gratifying to continually receive letters from customers telling us of prizes they have won for blooms produced from our Delphinium plants. The illustration on page 5 is a reproduction of a plant grown by one of our local customers and is typical of what our strain produces. The unusually fine range of color, perfect form, and enormous size of these Hybrids have been achieved by years of careful study and selection of seed.

Delphiniums grow nicely in many different kinds of soils, but they especially like a heavy clay loam. When planting, use one small handful of a good organic fertilizer, such as Driconure, and one of a good commercial fertilizer to each plant. Incorporate these well with the soil in each hole before placing the plant. The field-grown clumps should be planted so that the crown is barely covered with soil. Young pot-plants should be planted so that the ball is covered about one-half inch with soil.

Delphiniums like plenty of water. During dry spells, water thoroughly at least once a week. An occasional light sprinkling in the evening, after a hot day, is very beneficial. Always keep the ground well cultivated to a depth of about 2 inches. If the lateral growths on each spike are removed, the individual flowers will be larger.

Artemisia

Lactiflora. A tall-growing plant with fine foliage and heads of small white flowers which fill the garden with fragrance. Good for cutting. 3 to 4 ft. Aug., Sept. 25 cts. each, \$2.50 per doz., \$17.50 per 100.

THE MOOR

KING MIDAS

EMBER

KOREAN HYBRID CHRYSANTHEMUMS

The Korean Hybrids were the greatest advance that had been made in Chrysanthemums in many years, and, in spite of the fact that all of the first varieties were single, they became so immensely popular that when double types made their appearance they were assured of an immediate welcome.

On this page we are listing four of these double Koreans that are just about as nice as they can be.

The plants of these hybrids are harder than the old garden Chrysanthemums, and the flowers not only have a different luster and finish, but they have individual scents quite apart from the old varieties.

THE MOOR has lovely flowers of a very different Chrysanthemum color—an odd shade of dark red, described as amaranth-purple or port-wine-red. It is distinct in the garden and makes a fine cut-flower. The height is about 2½ feet, and it blooms by late September.

KING MIDAS is a big fluffy flower of soft yellow, overspread with bronze at certain periods. Four-inch blooms are average. It makes 2½-foot growth and blooms in late September.

EMBER is much smaller, with 2½-inch blooms. The color is a glowing bronze, made up of coral and orange shades, and it is an effective cut-flower. The height is 2½ feet, and it blooms about mid-October.

These three varieties are
50 cts. each, \$5 per doz.

INDIAN SUMMER has 3-inch flowers of bronzy orange—a true autumn color. The 2½- to 3-foot plants are free with their flowers from late October until frost. 25 cts. each, \$2.50 per doz.

GAILLARDIA, MR. SHERBROOK

A fine yellow Gaillardia that is really easy to grow and blooms from early June until fall. Its golden yellow flowers make desirable cutting material. 50 cts. each, \$5 per doz.

BUDDLEIA, CHARMING

At last we have a pink Butterfly Bush and one with many virtues besides its lovely color. It grows quickly and blooms generously. Should be in every garden. 75 cts. each, \$7.50 per doz.

Bedding Plants

We carry a full line of Bedding Plants suitable for cut-flowers, bedding, and window-boxes. We offer these principally for customers within delivery distance for our trucks. It is not advisable to ship annuals.

Annual Plants

All our Annuals are strong, healthy plants potted in individual pots. These potted Annuals produce better results than ordinary plants from flats because the roots are not disturbed when transplanted. Annuals may be planted any time after May 15. We carry a large variety of Annuals and Annual vines including all the latest novelties, many of which will be of great assistance in the perennial border.

Annual price-list sent on request.

Have you ever grown Turner's Delphiniums? They are the finest grown, with immense spikes of large flowers of all shades.

EVERGREENS

The planting of Evergreens about the home is one of the finest investments one can make. They increase in value and beauty each year as they grow into larger and finer specimens. There is nothing to equal the Evergreens for adding warmth, color, and background to the home and grounds.

We are always glad to submit estimates for landscaping on request.

The following prices are for exceptionally fine, bushy, well-shaped trees, dug with a generous amount of soil, and burlapped. You will find that our Evergreens measure well up to each size. Many of these varieties are fine for rockery work.

RETINOSPORA PLUMOSA

Very graceful, with sweeping, plume-like branches covered with soft, springy foliage. It is a charming specimen plant or an attractive beauty in any group of evergreens.

PINUS MONTANA MUGHUS

THUJA OCCIDENTALIS PYRAMIDALIS

Columnar form of the popular Arborvitae particularly suitable for accent planting, for framing doorways or windows, and to produce avenue effects along garden walks.

HYBRID TEA OR EVERBLOOMING ROSES

These are the most popular of all Roses because of their ever-blooming habit and variety of color. We have always made a special effort to deliver extra-fine, strong, budded plants direct to the customer from our nursery where they are grown. This insures fresh, vigorous plants that will thrive and bring much joy and satisfaction to the grower. It has been very gratifying to receive many favorable comments regarding the type of Rose plants we have delivered to satisfied customers in the past.

Roses like a deep bed of about 12 to 14 inches of good soil, with well-decayed manure spaded in. Set bushes 1½ to 2 feet apart, placing them so that the junction of branches and root is just covered with soil. All classes of Roses should be pruned back severely to about 6 to 8 inches when planted.

Protect Hybrid Teas in the winter by hilling the soil up around the plants and covering with a litter of strawy manure or leaves. Be sure to remove this early in spring.

Extra-strong plants, 75 cts. each, \$7.50 per doz., \$50 per 100, except where noted

Betty Uprichard

Alezane. Plant Patent No. 116. Sorrel buds opening to apricot-colored flowers, freely produced. Splendid plants with attractive healthy foliage. A fine novelty. \$1.50 each, \$15 per doz.

Alice Harding. Plant Patent No. 202. The finest yellow Rose to date, with large, prize-winning flowers of golden yellow which does not mind the sun. The yellow Rose for exhibitions. A generous bloomer. \$2 each.

Ami Quinard. Fine, upstanding bush with numerous, semi-double, blackish crimson flowers, very dark and velvety.

Autumn. Gorgeous crimson-scarlet and gold buds, which open to deep yellow, very double flowers, streaked and flushed with crimson. Plant vigorous and free flowering, especially in the fall.

Betty Uprichard. A very fine Rose, unsurpassed in vigor, blooming, color, and resistance to heat or drought. Copper-red buds, opening to flowers of brilliant orange-carmine on outer surface of petals, showing light salmon reflexes.

Briarcliff. Large, pointed buds and double, high-crowned, fragrant blooms of brilliant rose-pink on good stems.

Carrie Jacobs Bond. Plant Patent No. 158. A magnificent Rose of exhibition form, rich deep pink, enhanced by a luminous coral sheen. Close-growing, upright plants. \$1.50 each, \$15 per doz.

Charles K. Douglas. A fine, bright red, semi-double Rose which is becoming very popular.

Charles P. Kilham. Large, beautifully shaped blooms of brilliant red-orange, suffused with glowing scarlet; slightly fragrant. Foliage resistant to mildew. Vigorous, bushy, upright.

Comtesse Vandal. Plant Patent No. 38. Superb, bronze-tinted buds with rose and orange tones, opening to huge, shapely, salmon-pink flowers flushed with gold and flesh tones. A consistent winner of first-prize honors. \$1 each.
